
We're focused on students' behavior before, during and after competition.

FACT: Steroids, meth, alcohol, tobacco, hazing and poor sportsmanship have no place in schools.

The Montana High School Association believes that students in activities are natural leaders. Aim Higher provides students with the tools to hone their leadership and their mentoring skills by creating a positive educational environment in the classroom, in activities and in life.

Aim Higher's program components focus on drugs, alcohol, tobacco and hazing to help educate students on the hazards of exhibiting negative behaviors as individuals and as members of the school community.

Learn more. Take part. Aim Higher.

Leadership • Mentoring • Sportsmanship • Drug Prevention • Hazing Awareness
